Learner Diversity: The Community and Home Environment

FS 1 FIELD STUDY

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

SPARK Your Interest

Episode 4 provides opportunities for youth and more in depth. Look into the factors that affect the development of a learner. Focus will be on the early experiences and characteristics of the learner as described by the family and other significant others. You also focus on how the teacher links with the community to maximize the learning and development of students.

TARGET Your Intended Learning Outcome

At the end of this Episode, I must be able to:

- Describe the influencing factors in the home environment that affect the students learning;
- Take advice concerning strategies that build relationships with parents or guardians and the wider community (6.2.1); and
- Identify effective strategies on how teachers can work with each other with the family.

REVISIT the Learning Essentials

1. Urie Bronfenbrenner's bio-ecological model presents the learner within the context of layers of nation ship systems that make up the learners' environment. The layers are:

Microsystem - includes the structures such as once family is cool and neighborhood.	**Mesosystem -** the connection between the structures in the microsystem.	**Exosystem -** the the bigger social system which includes the city government, the workplace and the mass media.	**Macrosystem** - outermost layer, which includes cultural values, customs, and laws.	**Chronosystem -** the element of time patterns of stability and pacing of the child's everyday life.

The model helps the picture looked into every aspect in the learners environment to understand his behavior. That features important role is not to replace what is missing at home (If any), but to work so that the school becomes an environment that welcomes and nurtures families. The teacher works to create a partnership with the family and community to bring out the best in every learner.

2. Baumrind's Parenting Styles
   Authoritarian. Parents are very firm with their children and expect unwavering and unquestioning obedience. Rules are, sadly parents and misbehavior is smelled weird. Withdrawal of affection, physical punishment or threats
   Permissive. Parents are not fear or controlling. They have few expectations, maybe warm and caring, but appear to be uninvolved and uninterested.
   Rejecting-neglecting. Parents are disengaged from children. Neither demanding nor responsive to children.

Children of:

Authoritarian parents: are often unhappy, fearful, withdrawn, inhibited, hostile, and angry and aggressive. They have low self-esteem and difficulty with peers.

Permissive parents: believe that their parents do not care for them. They are often impulsive, aggressive and lack self-control. May they have low levels of independence and responsibility.

Rejecting-neglecting parents. Are found to be the least competent in their overall functioning and adjustment.

Authoritative Parents: are used are socially competent, self-reliant, and have greater ability to show self-control. They have higher self-esteem and are better adjusted.

- *Based on child development by SANTROCK 2004.*

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

OBSERVE, ANALYZE, REFELCT

Activity 4.1

Observing the learner's community and home environment.

Name of the FS Student: **JEWEL B. OCTA**

Course: **BSED MAJOR IN SCIENCES** Year and Section: **BSED SCI 4-A**

Resource Teacher : **ROMMEL B. MANINANG JR.** Signature: Date: **AUG. 26, 2026**

To realize the **Intended Learning Outcomes**, where you're always through these steps:

1) Select a learner from the class which you have previously observed
2) Interview the teacher about the learner's characteristics and the community.
3) Conduct a home visit to your selected learners' residence.
4) Interview the parents about.
   a. The rules they implement at home concerning their child's schooling.
   b. The learners, activities, and behavior while at home.
5) Write the learner's profile.
6) Analyzed observation and interview data.
7) Reflect on your observation experience.

OBSERVE

Use the **activity form** provided for you to document your observations.

FS 1 FIELD STUDY

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

An Observation/Interview Guide for the Home-School Link

Read the following carefully before you begin to observe/interview. Then write your observation report on the space provided on the next page.

The Learner

1) Make a general observation of the learner. Describe him or her in each of the domains of development:
   - physical-body build and height (thin, chubby, underweight, overweight), level of physical activity (fast, slow, lethargic, active, etc.)
   - social interaction with teachers and classmates (loner, shy, sociable, friendly, gets into fights, like by others, etc.)
   - emotional moods, temperament, cries easily, loses temper, happy, shows enthusiasm, excited, indifferent etc.
   - cognitive (appears to understand lessons, copes with the lessons, excels, lags behind, shows reasoning skills, turn in assignments, and requirements, etc.

Interview the Teacher

1) What are the most noticeable characteristics of the learner? (emotional disposition, behavior and discipline, sense of responsibility, study habits, academic performance, relationship with peers, relationship with adults, social adjustment)
2) How does the teacher communicate with the parents? how often? what do they discuss? How do they decide on the best course of action to resolve issues or problems?
3) How does the teacher utilize resources in the community to support the teaching-learning process? How does the teacher work with the community to meet the needs of the learners?

Interview with parents

1) Conduct a home visit. Once there observed the home set up. (home is orderly, family pictures in the living room, etc.)
2) Use the interview questions on the next page. Just ask the questions with which you feel comfortable.

Suggested parent interview guide

Your teacher may ask you to use a more detailed interview guide. Be free to translate the questions if necessary.

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

Name of Learner:
Date of Birth: _____ Age: _____ Grade/Year Level: _____ Gender: _____ Number of Siblings: _____ Birth Order: _____
Parents: Mother: _____ Age: _____Occupation: _____Educational Attainment: _____ Father: _____ Age: _____Occupation: _____Educational Attainment: _____ Learner's Physical Aspect: Health 1) Mothers' health during pregnancy with the learner: 2) Ailments or health problems of the learner as a child: 3) Age of the learner when he/she started to walk or talk: 4) Food preferences of the learner as a child and at present: 5) Who took care of him or her as a child?
Learner's Social Aspect: 1) Describe your child sociability (friendly, outgoing or shy, loner) 2) Who were the learner's playmates? 3) As a child then, was he or she allowed to play outside? 4) Is he or she allowed to go out with friends? 5) Do you have rules for him or her to follow regarding going out? 6) What are these rules?
Emotional-Moral 1) What are your expectations of the child? 2) How do you provide a nurturing environment for your child? 3) Does your child go to you when she or he feels down or has a problem? What do you do to meet her or his emotional needs? 4) What do you do when he or she is not successful in something?
How do you discipline your children? 1) Do you have rules in the House? What are they? 2) How do you impose the rules? 3) What are the consequences of breaking the rules?
Learners' Cognitive Aspect: 1) What are the child's interests? 2) What is he or she good at in school? 3) In what subject/s does he or she have difficulty. 4) How do you monitor his or her performance in school? How do you motivate him or her? 5) Do you have rules at home to help him develop good study habits? 6) What are these rules? How are they implemented?

After you have gathered all the necessary data. Write the learner's development profile using the outline below, type the profile on a separate sheet and attach it to this learning episode.

FS 1 FIELD STUDY

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

THE LEARNER'S DEVELOPMENT PROFILE (Outline)

Name of the Learner: **MAXIMUS J. ABOGADO**
School: **ABAÑO LABORATORY SCHOOL**
Date of Home Visit: **AUGUST 25, 2026**
Date of Birth: **MAY 07, 2026** Age: **12**
Grade/Year Level: **GRADE 9** Gender: **MALE**

Family Profile
Number of siblings: **2 (GIRLS)**
Birth order: **ELDEST**
Parent
Mother: **JOAN J. ABOGADO** Age: **36**
Occupation: **ZUMBA INSTRUCTOR** Educational Attainment: **COLLEGE GRADUATE**
Father: **MARK ANTHONY G. ABOGADO** Age: **36**
Occupation: **PRIVATE EMPLOYEE** Educational Attainment: **COLLEGE GRADUATE**

Physical Development

In paragraph form describe the physical development of the learner. Combine the teacher's, parents' responses and your own observations.

- The learner's physical development has been generally healthy and normal. According to the parents, there were no health concerns during pregnancy or birth, and the learner remained healthy while growing up with no present health problems. The learner's eating habits are influenced by personal preferences, with the parent noting that the learner usually eats whatever food they prefer. In terms of early physical milestones, the learner began walking at around 9 months and started talking 13 months. Overall, the learner shows healthy physical development with no reported health concern.

Emotional-Moral Development

In paragraph form describe the emotional-moral development of the learner. Combine the teacher's, parents' responses and your own observations.

- The learner's emotional and moral development shows a healthy ability to express feelings and seek support when facing difficulties. When feeling sad, worried, angry, or having a problem, the learner usually becomes hungry. When faced with problems, the learner approaches the parents or another family member, who provides feedback and guidance. The parents also encourage the learner when experiencing failure or difficulty by reminding them that losing is normal and part of learning. In terms of expectations, the parents allow the learners to make their own choices and do what they want. Overall, the learner is supported in managing emotions, coping with challenges, and developing independence and resilience.

Cognitive Development

In paragraph form describe the cognitive development of the learner. Combine the teacher's, parents' responses and your own observations.

- The learner showed a variety of interests and activities that support cognitive development, including playing volleyball, using a cellphone, and playing chess. The

learners demonstrates strength in English, indicating good skills in communication and language. However, Science is identified as a subject that the learner finds difficult and may require additional support and encouragement. The parents actively monitor the learner's academic progress by asking about school performance and checking the learner's notebook. Therefore, the learner shows strengths in language and physical activities while continuing to develop areas that is particularly challenging for him at the moment.

Findings

Write here your salient findings about the learner.

- The learner shows generally healthy amd well-rounded development. Physically, the learner has no reported health concerns and reached early milestones normally. Emotionally, the learner is supported by his family and is encouraged to cipe with challenges and accept failure. Cognitively, the learner shows strengths in English and enjoys activities such as volleyball and chess, but finds Science challenging. Hence, the learner benefits from supportive family who monitors school progress while allowing the learner to develop independence.

Conclusions

Write your conclusions after you have analyzed the impact of the school and the home on the learner's development. The questions in the Your Analysis portion of this learning Episode can help you.

- The learner's development is positively influenced by both and school. The supportive home environment helps the learner feels secure, cope with challenges, and develop independence, while the school provides opportunities to build knowledge, skills, and confidence. The learner's strengths in English and interests in activities such as volleyball and chess show positive growth, while the difficulty in Science suggests a need for continued guidance and support. Therefore, a strong partnership between home and school can help the learner develop academically, emotionallym socially, and physically.

Recommendations

Write your recommendations.

- I recommend that the parents should continue providing encouragement, guidance, and support allowing the learner to develop independence. Regular communication with teachers should also be maintained to monitor the learner's progress and identify areas that needs improvement. Since the learner finds Science quite challenging, additional activities, practice, amd guidance may help improve understanding and confidence in the subject. The learner should also be encouraged to continue participating in enjoyable activities such as volleyball and chess to support overall development.

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

ANALYZE

Your findings and recommendations in the learner development profile will help you answer the following questions here.

1) From your home. Visit and interview. What do you think? Is this style of parenting experience by the teacher? Explain your answer.
   - Yes, by observing how the parents provide and encouragement, guidance, and support while also allowing the learner to make their own choices, the teacher can learn that children need both support and independence. The experience can help the teacher better understand the learner's emotional, academic, and personal needs and apply a more caring and patient approach when guiding the students.
2) Relating your data with what you learned from child development, what family factors do you think contribute to the development and over-all adjustment of the learner in school?
   - The family plays an important role in the learner's development and adjustment in school. The parents provide encouragement and guidance, especially when the learner experiences challenges or failures, helping build confidence and resilience. They also show interest in the learner's education by asking about school performance and checking schoolworks. At the same time, allowing the learners to make choices help develop independence and responsibility. Therefore, a supportive family gives the learners a sense of security and motivation, which helps them cope with challenges and adjust well in school.

3) Does the communication between the homes-school have an effect on the learner. If yes, what are these effects?
   - Yes, communication between home and school has a positive effect on the learber. It helps both parents and teacher umderstand the learner better, including their strengths, needs, and challenges. Through regular communication, they can identify areas that need improvement and provide appropriate support. This also helps ensure that the learner receives consistent guidance both at home and in school, ehivh can improve their academic performance, behavior, and overall development.

4) How can the teacher partner with the community to contribute to the development and learning of the students? Who are the people or which institutions can the teacher tap to seek advice regarding the development and learning of students?
   - The teacher can partner with the community by working closely with the parents first, since they know the learners' background, needs, strengths, and challenges. The teacher can also seek additional support from school administrators, guidance counsellors, fellow teachers, health professionals, and community leaders. Working together with these people can provide the learner with appropriate academic, emotional p, and developmental support

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

REFLECT

1) Reflect on your own development as a child. What type of parenting did you experience? How did it affect you?
   - Growing up, I experienced a parenting style that was easy going, supportive p, and balanced. My parents allowed me to do the things I wanted and explore the world on my own, but they also set healthy limitations to make sure I understood what was right and safe. They gave me the freedom to make my own choices and learn from my experiences rather than controlling every decision I make. At the same time, they we're always there to guide, support, and encourage me whenever I needed them.

     This kind of parenting had a very positive effect on my development. Because my parents trusted me and have me opportunities to make decisions, I learned how to become independent and responsible for my actions. I became more confident in facing different situations because I believe that growing up in a loving and supportive family helped me feel secure and valued. Looking back, I believe that growing up in a loving and supportive family helped me become the person I am today and taught me that children can grow best when they are given both freedom to explore and guidance to stay on the right path.

2) As a future teacher, how would you establish good home-school collaboration? How can you work well with the parents? How can you help them? How can they help you?
   - As a future teacher, I would establish a good relationship with parents through open, respectful, and consistent communication. I believe that parents and teachers have the same goal, which is to help the student grow and succeed. I would regularly communicate with parents about their child's progress, behavior, strengths, and areas that needs improvement, not only when there is a problem. This would help the parents understand how their child is doing in school and give them a chance to share what they can observe at home.

     I would also help parents by providing clear feedback and suggesting simple ways they can support their child's learning at home. Instead of simply pointing out weaknesses, I would focus on finding solutions and working together with them. In return, parents can help me by sharing important information about their child, such as their interests, habits, difficulties, and changes they notice at home. Their insights can help me understand the learner better and adjust my teaching approach when needed. Through mutual trust, communication, and cooperation, I can create a strong partnership with parents that will support the learner's academic, emotional, and personal development.

ANALYZE

Your findings and recommendations in the Learner Development Profile will help you answer the questions here.

1) From your home visit and interview, what do you think is the style of parenting experienced by the learner? Explain your answer.
   - Based on the interview, the learner appears to experience a permissive parenting style. The parents seem to give the learner considerable freedom to make choices and do what they want with few strict expectations. Although the remian supportive and involved, especially when the learner experiences difficulties or failure. They provide encouragement and guidance rather than using harsh discipline or excessive control. This parenting style may help the student develop confidence and independence, although continued guidance and appropriate boundaries are also important.
2) Relating your data with what you learned from child development, what family factors do you think contribute to the development and over-all adjustment of the learner in school?
   - Based on the data I have learned about child development, I believe that love, support, encouragement, and freedom with proper guidane are important family factors in the learner's development. The parents' involvement in the learner's school progress, their willingness to listen and give advice, and their encouragement when the learner experiences challenges and failures help build confidence and emotional security. Giving the learner space to grow and make choices also allows them to become more independent and responsible. Because of this supportive family environment, the learner can adjust better in school and is not afraid to learn, explore, participate, adn try new things. Hence, a loving amd supportive family gives the earner a safe foundation where they can grow, learn from experiences and become the best version of themselves.
3) Does the communication between the home-school have an effect on the learner? If yes, what are these effects?
   - Yes, communication between home and school has a positive effect on the learber. It helps both parents and teacher umderstand the learner better, including their strengths, needs, and challenges. Through regular communication, they can identify areas that need improvement and provide appropriate support. This also helps ensure that the learner receives consistent guidance both at home and in school, ehivh can improve their academic performance, behavior, and overall development.
