OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 7 Physical and Personal Aspects of Classroom Management

SPARK Your Interest

This episodes tackles classroom management and discipline. It focuses on the personal and phycial aspects of classroom management which are central to teaching and therefore must be consistently implemented.

TARGET Your Intended Learning Outcome

At the end of this Episode, I must be able to:

- Identify the two (2) aspects of classroom management; and
- Determine the classroom management strategies that the Resource Teacher employed in his/her class.

REVISIT the Learning Essentials

Classroom management refers to the wide variety of skills and techniques that teachers use to keep students organized, focused, attentive to tasks, and academically productive in class.

Ref: edglossary.org

Importance of Effective Classroom Management

- Increase the chance of student success
- Paves the way for the teacher to engage students in learning
- Increases instructional time
- Creates consistency in the employment of rules and regulations
- Aligns management strategies with his schoolwide standards.
- Decreases misbehavior in the classroom.
- Gives student boundaries as well as consequences.

Ref: http://www.ehow.com

Two Aspects of Classroom Management

1) Personal Classroom Management consists of managing yourself to ensure order and discipline in your class. It includes:
   1.1 Voice
   1.2 personal grooming

1.3 attendance
1.4 punctuality
1.5 personal graciousness

Managing yourself as a teacher contributes to the order and well-being of your class.

2. Physical Classroom Management consist of managing the learning environment. Attending to this, physical elements of the learning environment ensure the safety, security and order index class. It includes:
   2.1 ventilation
   2.2 lightning
   2.3 acoustics
   2.4 seating arrangement
   2.5 structure or design of the classroom
   2.6 basically, space or learning stations

Some effective Classroom Management.

1. Model to the students how to act in different situations.
2. Establish classroom guidelines.
3. Document the rules.
4. Refrain from punishing the entire class.
5. Encourage initiative from class.
6. Offer praise and rewards.
7. Use non-verbal communication.
8. Take time to celebrate group effort.
9. Let the students work in groups.
10. Interview students to assess their needs.
11. Address bad behavior quickly.
12. Consider pure teaching.
13. Continuously engage the students.
14. Assign open in the project.
15. Right group contracts.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 7 Physical and Personal Aspects of Classroom Management

OBSERVE, ANALYZE, REFELCT

Activity 7.1

Identifying Personal and Physical Aspects of Classroom Management

Resource Teacher : **ROMMEL B. MANINANG JR** Signature: School: **Abaño Laboratory school**

Year and Section: **GRADE 9** Subject: **SCIENCE** Date: **08/28/26**

OBSERVE

Survey the class and interview the resource teacher. Ask how the personal and physical aspects of classroom ensure proper classroom management and discipline.

Check if these aspects were observed in the classroom.

Aspects of Classroom Management	YES	NO
1. Personal Classroom Management		
1.1 Is the teacher well-groomed that he/she demands respect from the learners?	/	
1.2 Is the teacher's voice modulated and can it be heard by the entire class?	/	
1.3 Was the teacher present in class?	/	
1.4 Did the teacher arrive on time in class?	/	
1.5 Does the teacher exude a positive attitude towards teaching?	/	

2. Physical Classroom Management		
2.1 Is the classroom well-ventilated?	/	
2.2 Is the lighting good enough?	/	
2.3 Is the classroom free from noise?		X
2.4 Does the seating arrangement provide better interaction?	/	
2.5 Is the design/structure of the room inviting to classroom activities?	/	
2.6 Is the physical space/learning station clear from obstruction?	/	

ANALYZE

Analyze the different elements of personal or physical classroom management and answer the following questions.

1. How does the voice of the teacher affect classroom instruction?
   - The teacher's voice has a major effect on classroom instruction because it influences students' attention, understanding, motivation, and classroom behavior. I believe that effective use of voice makes teaching more engaging while creating a positive learning environment. A teacher who adjusts tone, volume, pace, and expression according to the lesson and students' needs can communicate more effectively and deliver knowledge efficiently.

2. How does the functionality of the teacher affect classroom discipline?
   - I believe that a teacher plays a central role in maintaining classroom discipline. As the leader of the classroom, the teacher has the authority and responsibility to guide students, set clear expectations, and create an environment where everyone can learn. However, being the center of the classroom does not mean that the teacher should simply control the students. The teacher should lead by example, communicate clearly, and treat students with fairness and respect. When students understand that the teacher's expectations and see that these rules are more likely to cooperate and behave appropriately. A teacher who is approachable but firm can also help students feel comfortable while understanding the boundaries that needs to be followed. In this way, the teacher's functionality greatly affects classroom discipline because effective leadership, guidance, and consistency can creata a classroom that is orderly, respectful, and conducive to learning.

3. Why do we need to check on the physical aspects of classroom management?
   - We need to check the physical asoects of classroom management because the environment can greatly affect hiw students learn and behave. It is important to co suder different factors such as the arrangement of chairs, lighting, ventilation, cleanliness, available soace, and accessibility of learning materials. They may seem simple things, but they can influence students' comfort, attention, participation, and overall experience. For example, a crowded or poorly arranged classroom may make it difficult for students to move, interact, or focus in the lesson. As teachers, we need to be aware of these factors because effective classroom management is not only about controlling students' behavior but also about creating a space where they feel comfortable, safe, amd ready to learn. By paying attention to the physical environment, we can help create a more organized and conducive learning environment for everyone.

REFLECT

Reflect on the aspects of personal and classroom management.

1. What does this statement mean to you as a future teacher? Explain.
   "No amount of good instruction will come out without effective classroom management. "
   - For me, the statement means that even if a teacher has good teaching strategies and knows the lesson very well, effective learning may still be difficult to achieve without proper classroom management. As a future teacher, I believe that the teacher plays an important rile in keeping the classroom organized, focused, and ready for learning. Without proper guidance and leadership, the classroom can easily become unorganized, which may distract the students and disrupt the learning process.
     For example, if the chairs are not properly arranged, the students may have difficulty moving around, seeing the teacher, or participate in activities. This may seem like a small detail, but it can already affect their concentration and engagement. The same applies to classroom rules, routines, and overall organization of the learning space. These things help create an environment where students know what is expected of them and can focus better on the lesson.

As a future teacher, I realized that effective instruction is not only about delivering the lesson well. It is also about preparing the classroom and the students to learn. When classroom management is handled properly, the teacher can teach more effectively, and students are given a safe, organized, and comfortable environment where they can participate, learn, and grow.

2. What are your plans for ensuring effective classroom management?
   - My plan for ensuring effective classroom management isnto make the most of the slace and resources available in the classroom and turn them unti a supportive learning environment. I want to organize the classroom based on the needs of my students and the actual situation of the classroom, rather than simply following one fixed arrangement. I believe that every group of learner is different, so the classroom set up should also be flexible enough to accommodate their needs and activities we will be conducting.

     As a future teacher, I also want to learn how to anticipate possible challenges before they become a bigger problem. I know that not everything will always go according to plan, so I need to be observant, flexible, and ready to find solutions when oriblems arise. I want to establish clear routines amd expectations while still being approachable and understanding towards my students.

     Most importantly, I want my classroom to be a place where students feel comfortable, welcomed, and resdy to learn. For me, effective classroom management is not simply about keeping the classroom quiet or making students follow rules. It is about creating an environment where students feel safe, respected, and motivated to participate. By keeping the classroom organized and responding to my students' needs, I hope to create a learning environment where both teachers and students can grow and learn together.

Activity 7.2

Listing Down Classroom Rules

Resource Teacher : **ROMMEL B. MANINANG JR.** Signature: _____ School: **ABAÑO LABORATORY SCHOOL**

Year and Section: **GRADE 9** Subject: **SCIENCE** Date: **08/28/26**

OBSERVE

Observe the classroom management strategies that your Resource Teacher employs in the classroom. You may also interview to substantiate your observation.

Check the management strategies employed by the Resource Teacher.

Check (√) observed, put an (x) if not observed and O for no opportunity to observe.

Effective Classroom Management Strategies	Observed	Not Observed	No Opportunity to Observed
1. Model to the students how to act in different situations.			
2. Establish classroom guidelines.	/		
3. Document the rules.			
4. Refrain from punishing the entire class.			/
5. Encourage initiative from class.	/		
6. Offer praise and rewards.	/		
7. Use nonverbal communication.			
8. Take time to celebrate group effort.	/		

9. Let students work in groups.	/		
10. Interview students to assess their needs.			
11. Address bad behavior quickly.			/
12. Consider peer teaching.		/	
13. Continuously engage the students.	/		
14. Assign open in the project.	/		
15. Write group contracts.		/	
Others (Please specify)			

ANALYZE

Analyze the checklist you have accomplished and answer the given questions:

1. How many strategies were employed by the resource teacher? Did this contribute to better classroom management? Explain your answer.
   - According to Sir Rommel, he particularly mentioned three strategies to manage his class effectively. First, when he notices that the students' attention is starting to drift away from him and the lesson, he raises his voice to catch their attention and bring their focus back. Second, he uses positive reinforcement by praising students for doing well or giving them additional points for good behavior and performance. Lastly, he gives students certain privileges or reward when they showed good behavior or finish their task ahead of the class.

     I belive that these strategies contributed to better classroom management because they help the students attentive and motivated. Instead of constantly reprimanding the students p, Sir Rommel encourages them to behave well by recognizing their efforts and giving them something to look forward to. This makes the students more participative and willing to listen because they know their good behavior and performance are appreciated. Overall, his strategies create a classroom environment where students are encouraged to cooperate while still enjoying the learning process.

2. What were not used by the resource teacher? Where is this important? What should have been used instead? Explain.
   - I think what was not used by the resource teacher was negative reinforcement or constantly reprimanding the students when they made mistakes or performed poorly. Instead of making students feel bad about what they did wrong, the teacher encourages them to do better next time. I think this is important because students can learn from their mistakes without feeling embarrassed or discouraged. The

teacher's constant encouragement helps them become more confident and motivated to improve. For me, positive reinforcement is more effective because it creates an environment where students are not afraid to make mistakes and are instead inspired to keep trying and do better.

SHOW Your Learning Artifacts

Show piece(s) of evidence of learning to capture the classroom management strategies used by the Resource Teacher.
