FS 1 FIELD STUDY

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

SPARK Your Interest

Moving towards teacher quality? Wanted! A Global Teacher of the 21" Century!

In 2013, a Global Status Index was determined by the Varkey GEMS Foundation and revealed significant findings. There were 21 countries surveyed which represented the major continents of the world. In most countries that participated, it was found out that like the Philippines, teaching is the most sought profession. It was comparable to being a social worker, librarian, nurse, and even doctor. The majority of the parents asked, answered that they encourage their children to become teachers. To them, teaching is one of the most respected and trusted professions.

However, with the change in the global landscape, 21st-century teachers must have the competence to address the new learning environment, the new learning contents, the processes of learning and how these are facilitated, and the new types of learners.

Hence, we need a new type of teacher, a glocal 21* century Filipino teacher.

(Global Teacher Status Index p. 123 Teaching Profession)

TARGET Your Intended Learning Outcome

At the end of this episode, I must be able to:

- describe the personal qualities and competencies of glocal classroom teachers of the 21st century; and
- design a learner-centered classroom for 21st-century learners with safe learning spaces, that allow creativity and use of ICT.

REVISIT the Learning Essentials

FILIPINO GLOCAL TEACHER

A survey of the ASEAN countries and beyond tends to show that there are three major responsibilities of teachers. These are (1) Actual Teaching. (2) Management of Learning and (3) Administrative Work.

While the number of actual teaching hours per day varies all over the world, in our country, teaching in public schools requires six hours of actual teaching, which includes administrative work such as management of learning per day. The two hours of the working day are allotted to administrative work such as scoring and recording learners' outputs, making reports, filling forms, preparing for the next day's activity, and performing other administrative tasks. The previous Episode on the teacher reminded us of the qualities and competencies mentioned earlier. Teachers should be multi-literate, multi-cultural, multi-talented, innovative and creative. The future Filipino teacher like you shall act locally but think globally.

"Teach local, reach global" means that the teacher brings diverse experiences in the classroom with the various skills to live and work as citizens of a global society. What teachers do in the local communities impacts the larger community. As global citizens, the work begins, where the teachers are, thus a "glocal" teacher.

Towards Quality Glocal Teachers

Quality teachers are characterized by different attributes and skills needed in 21st-century education. Partnership 21 identified (1) Global awareness, (2) Financial, economic, business, and entrepreneurial literacy, and (4) Civic and Health Literacy which require:

1. Learning and Innovative skills.
2. Information, Media and Technology Skills
3. Life and Career Skills

More specifically, quality teachers are competent teachers who can demonstrate exemplary mastery of knowledge, skills, values, and dispositions relative to the following characteristics:

1. Understand one's own cultural identity and rootedness
2. Knows and integrates global dimensions in the subject area
3. Engages learners in the learning processes
4. Uses real-life local and global examples
5. Values the inputs of culturally and linguistically diverse learners
6. Models social responsibilities in local and global content

7. Encourages learners to find appropriate actions to improve local and global the conditions, and
8. Creates a learning environment that encourages creativity and innovations.

The Challenges of the Quality Glocal Teachers for the 21" Century

One of the major challenges of quality teachers is to "create a learning environment that encourages creativity and innovation among learners." With it, comes the management of learning in such environment. These are required skills for a global teacher.

Majority of the current classrooms provide learning spaces that can hardly prepare the 21" century learners for the development of the 21" century skills.

Since the 21" century classroom is learner-centered, the teacher acts as a facilitator of learning. Students no longer study each subject in isolation, but they work on interdisciplinary projects that cover several subject areas. Learning. is no longer for memorizing and recalling of information but on learning how to learn. Thus classroom designs should respond to the 21st century learning. More so, quality teachers should be changing their roles from teaching in isolation to co-teaching, team teaching and collaboration with students and peers.

A new and creative design of classrooms by the teachers is needed as well as the management of learning. These are the two teacher qualities needed to address the new roles of teachers.

How should a new classroom be? Here are some suggestions on the six elements of a new classroom:

1. Flexibility of furniture and space
2. Collaborative learning
3. Facilitation of movement
4. Foster creativity
5. Use of technology
6. Provision of light and bright colors

With the classroom structure, a quality teacher should be able to manage learning under a very conducive learning environment. Teacher should use effective classroom management strategies that will ensure productive learning.

Quality teachers should manage learning in an enhanced classroom by seeing to it that learners are

- organized,
- orderly,
- focused,
- attentive,
- on task, and
- are learning.

This will take much of your skill, experience, and patience. The two important factors that may affect learning management are the use of technology and the diversity of learners.

OBSERVE, ANALYZE, REFLECT

Activity 15.1

A Day in the School Life of a Quality Teacher

Resource Teacher: **ROMMEL B. MANINANG JR.** Teacher's Signature: 
School: **ABAÑO LABORATORY SCHOOL** Grade/Year Level: **9** Subject Area: **SCIENCE**

Observation 1: This activity will require you to stay in school for one school day. Special arrangements by your faculty should be made for this purpose.

Procedure

1. Secure a permit to observe a quality teacher in the school for one whole class day.
2. Shadow the teacher in the three major responsibilities.
   - Actual Teaching
   - Management of Learning
   - Administrative Work
3. Use the key guide found in the matrix below.
4. Record data observed in your notebook. This will be your artifact.
5. If you missed seeing the evidence in the key guide, you may interview the teacher.
6. Make a narrative or essay of your answer entitled:" A Day in the School Life of a Quality Teacher".
7. If permitted, you may include the teacher's picture in action in your essay.

FS 1 FIELD STUDY

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

Note: Observe and record observations on the following aspects as key guide to observations.

Teacher's Major Responsibility	Key Guide for Observation (Carefully look for the indicators/behaviors of the teacher along the key points. Write your observations and description in your notebook. This will be one of our artifacts.)
A. Actual Teaching	This teacher 1. is learner-centered. 2. acts as a facilitator of learning. 3. has mastery of subject matter. 4. sees to it that learning outcomes are achieved. 5. is pleasant and fair in dealing with the learners.
B. Management of Learning	This teacher 1. allows all learners to participate in the lesson. 2. Consider the needs of the learners in the seating arrangement. 3. Use instructional support materials to help learners understand the lesson. 4. sees to it that learning is achieved within a period. 5. dismisses the class on time.
C. Administrative Work	This teacher 1. keeps records of learners' attendance every day. 2. keeps a record of formative and summative tests. 3. submits reports and other documents on time. 4. does other tasks as requested by superiors. 5. cooperates with peers and staff in the cleanliness and safety of the school.

Refer to the results of your observation to answer the questions that follow.

1. Which of the three responsibilities shows majority of the indicators being practiced?

   A. Actual Teaching?

- Based on my observation, the teacher was very learner-centered, giving students the opportunity to express their ideas and actively participate in the discussion. The teacher guided the class effectively by asking different questions during and after the lesson to check understanding.I also noticed that the teacher had strong mastery of the lesson, as the explanations and delivery were clear, organized, and easy to follow. Before moving to the next topic, the teacher made sure that students fully understood the concept to ensure that the learning outcomes were achieved. l appreciated how the teacher treated everyone fairly and maintained a friendly atmosphere where students felt comfortable to ask questions and share their thoughts without fear or hesitation.

B. Management of Learning?

- The teacher managed the class efficiently by ensuring that every student had the opportunity to participate, the teacher likes to randomly call the student to answer to make sure that all of the students will listen attentively and all have the oppurtunity to participate. The seating arrangements are arranged according to their surnames and girls and boys are seated alternately but when there are activities the students are allowed to change their seats to students to be able to interact easily as a group during activities. The teacher also uses different visual aids and presentations that helped make the lesson more interesting and easier to grasp. Time was well handled the teacher covered all the necessary points within the given period and dismissed the class on time. The overall learning environment was organized, active, and conducive to learning.

C. Administrative Work?

- I observed that the teacher was very responsible in handling administrative tasks. Attendance was checked during the class, and the teacher collected all the students' activities such as group tasks after discussions.

2. Which demonstrated behavior, do you find in the teacher that is worthy of emulation when you become a teacher? Describe.

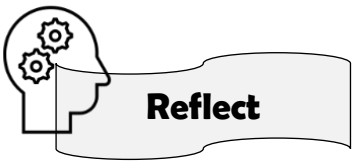

- The teacher always made sure to give students the opportunity to speak during every discussion through questioning. This approach allowed the teacher to check if the students were following the lesson and to hear their ideas, examples, or opinions related to the topic By doing so, the students felt that they were truly part of the discussion. The teacher also made everyone feel valued, and this kind of attitude created a positive classroom atmosphere where students felt confident and motivated to learn.

3. Which of the major responsibilities does this teacher find difficult to comply with? What are the reasons?

- Based on my observation, the teacher seems to find administrative work the most dlifficult. Given that the class period only lasts for an hour, it becomes challenging for the teacher to accomplish all administrative tasks such as checking learners' attendance, collecting and recording formative and summative tests, while also having enough time to discuss the lesson thoroughly

4. From your perspective, would you consider this teacher as quality teacher? Why?

- Yes, I consider Sir Rommel a quality teacher. Despite facing some challenges such as limited class time and occasional classroom distractions, he always managed to stay patient, flexible, and composed. He made sure that students not only learned but also felt safe, valued, and included in every discussion. The teacher created a welcoming classroom environment where students could express themselves freely and even relate their personal experiences to the lesson.His kindness, dedication, and effort to make every learner feel that they belong truly reflect the qualities of a great and compassionate educator—someone I hope to become in the future. He also talors his discussion to cater the different learning abilities of his students which makes him an excellent teacher that makes sure no student is left behind.

Now, that you have spent one school day to observe this teacher, it would be good for you to reflect on all your observations by answering reflective questions below.

1. Are you inspired to become a teacher after your observation? If yes, why? If No, why not?

- After spending the day observing the class, I can truly say that I am more inspired to become a teacher, although I also feel a bit nervous because I see the challenges teachers face every day. I have always loved teaching children, it brings me joy whenever I can help them and see their smiles, especially when they look up to me with admiration. Watching how the teacher handled the class with patience, confidence, and dedication reminded me why I chose this path. Seeing how the teacher motivated the students to participate and express their thoughts made me realize how powerful encouragement can be. Even small words of praise brought smiles to their faces and boosted their confidence. It made me understand that teachers don't just teach lessons, they help students believe in themselves.

2. When you become a teacher in the future, how else would you do better as a professional teacher?

- When I become a teacher in the future, I will strive to be more creative and flexible in my teaching strategies to meet the diverse needs of my students. I will make sure that every learner feels included and supported by using interactive and technology-based activities that make learning more engaging and meaningful.I will also continue to improve myself through seminars, trainings, and self-reflection so l can grow not just as a teacher but as a lifelong learner who inspires others to do the same.

3. What are some of the concerns that you foresee in the future as a quality teacher? Do you think you will be ready to address these? Give at least 2 concerns.

- One concern I foresee is adapting to the fast changes in technology and ensuring that my teaching methods remain relevant and effective. To address this, I plan to stay updated with the latest educational tools and innovations. Another concern is managing the different learning needs and behaviors of students. I believe I will be ready for this by being patient, understanding, and open to learning new classroom management strategies that promote inclusivity and respect.

4. In what aspects of the teacher's day, would you like to congratulate the teacher you observed? Can you show your appreciation to this teacher by sending a Thank you card? (Include this in your artifact)

- I would like to congratulate the teacher for showing patience, dedication, and genuine care throughout the day. Despite the challenges, the teacher maintained a positive attitude and managed to make every student feel valued and engaged in the lesson. I truly admire the way the teacher handled the class with confidence, encouraged participation, and built a warm learning atmosphere. If I could, I would thank the teacher through a simple card expressing my appreciation for being such an inspiring role model who reminds me of the kind of teacher I want to become someday.

OBSERVE, ANALYZE, REFLECT

Activity 15.2

The Creation and Management of the New Learning Environment as a Skill of the 21st Century Quality

Resource Teacher: **ROMMEL B. MANINANG JR.** Teacher's Signature: 

School: **ABAÑO LABORATORY SCHOOL** Grade/Year Level: **9** Subject Area: **SCIENCE** Date: **09/22/26**

This activity will allow you to develop your sense of creativity and imagination in designing a classroom for the 21* century and determining how to manage learning in this classroom.

OBSERVE

Procedure:

1. Draw or sketch the current classroom where you are observing.
2. **Indicate and label** all significant parts and furniture that you find inside including these but not limited to:
   a. Doors, windows
   b. Teacher Table, Demonstration table
   c. Cabinets, chalkboard, bulletin boards/display boards, etc.
   d. Gadgets, equipment
   e. Plant boxes, etc.
   f. Others not included in the list
3. Draw your vision of a classroom for the 21st century.

FS 1 FIELD STUDY

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

Make a comparison of your drawings A and B. Describe the similarities and differences. Explain why.

Features of the Present Classroom Component	My Vision of the Future Classroom	Why the similarity? Why the differences?
• Classroom arrangement: The present classroom has chairs and tables arranged closely, leaving limited space for movement. • Technology: A television or screen is available for presenting lessons. • Learning environment: The classroom is functional but can appear crowded and has limited space. • Student interaction: Students mostly face the front while listening to the lesson. • Learning resources: Some learning materials and students' belongings are placed around the classroom.	• The classroom will have a more flexible arrangement where chairs and tables can easily be moved for group activities and discussions. • The classroom will have improved technology such as interactive screens, computers, and other digital learning tools. • The classroom will be more spacious, organized, clean, and comfortable for learners. • Learning materials will be organized and easily accessible, including both printed and digital resources.	• Both need chairs and tables for learning, but the future classroom needs more flexibility to support different learning activities. • Both use technology to support learning, but future classrooms may provide more interactive and accessible technological resources. • Both provide a place for learning, but the future classroom should create a more comfortable and conducive environment. • The purpose remains learning, but the future classroom emphasizes active participation and collaboration. • Both need learning resources, but better organization will make them easier for students and teachers to use.

Based on the task that you made, what challenges await you as a future teacher? How will you manage learning in the future classroom? How will you prepare yourself to respond to 21st teaching-learning and become a glocal teacher?

Make a short paragraph on how will you manage teaching-learning in the 21st century classroom?

FS 1 FIELD STUDY

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

As a future teacher with my first experience in the field, I know I will face several challenges such as adapting to new technologies, exploring and adjusting my teaching strategies to meet the diverse needs of students, keeping lessons relevant in a fast-changing world, and finding effective ways to motivate and capture students' attention.I will manage teaching and learning by integrating various technologies into my discussions and providing hands-on activities that will help students understand concepts more easily and stay engaged throughout the lesson. I will also promote collaboration and problem-solving to prepare them for real-life situations. To prepare myself for 21st-century teaching and to become a glocal teacher, I will attend different seminars, training sessions, and other learning opportunities to continuously improve my skills. I will also connect my lessons to both global and local issues to make learning more meaningful and relevant to students' lives.

FS 1 FIELD STUDY

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

A. Actual Teaching

- Based on my observation, the teacher was very learner-centered, giving students the opportunity to express their ideas and actively participate in the discussion. The teacher guided the class effectively by asking different questions during and after the lesson to check understanding.I also noticed that the teacher had strong mastery of the lesson, as the explanations and delivery were clear, organized, and easy to follow. Before moving to the next topic, the teacher made sure that students fully understood the concept to ensure that the learning outcomes were achieved. l appreciated how the teacher treated everyone fairly and maintained a friendly atmosphere where students felt comfortable to ask questions and share their thoughts without fear or hesitation.

B. Management of Learning

- The teacher managed the class efficiently by ensuring that every student had the opportunity to participate, the teacher likes to randomly call the student to answer to make sure that all of the students will listen attentively and all have the oppurtunity to participate. The seating arrangements are arranged according to their surnames and girls and boys are seated alternately but when there are activities the students are allowed to change their seats to students to be able to interact easily as a group during activities. The teacher also uses different visual aids and presentations that helped make the lesson more interesting and easier to grasp. Time was well handled the teacher covered all the necessary points within the given period and dismissed the class on time. The overall learning environment was organized, active, and conducive to learning.

C. Administrative Work

- I observed that the teacher was very responsible in handling administrative tasks. Attendance was checked during the class, and the teacher collected all the students' activities such as group tasks after discussions.

1. Activity 15.2 Drawing of the present classroom and a Drawing of your Vision of the Classroom for the 21st Century.

2. Activity 15.2 Narrative on how you will manage teaching-learning in the 21st Century classroom.
   - In managing teaching and learning in the 21st-century classroom, I will create an environment where students are actively engaged and take part in their own learning. I plan to integrate different technologies into my lessons to make discussions more interactive and meaningful. Alongside this, I will design hands-on activities that will help students easily grasp complex concepts and maintain their interest throughout the lesson. I also aim to promote collaboration and problem-solving among learners to help them apply what they learn to real -life situations. Through these strategies, I hope to make learning not only effective but also relevant and enjoyable for my students.
